EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the claims:

Claim 43, line 3 after "a" second occurrence – region of support (ROS) -- has been inserted.

Claim 43, line 3, "ROS" has been deleted.

Allowable Subject Matter

2. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claim 39-48 are found to be in condition for allowance.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a motion estimation method

Art Unit: 2613

comprising the steps of conducting a local search of a plurality of video frames using a small diamond search pattern or an adaptive rod pattern for performing an initial search of each pixel block of the plurality of video frames, computing a local motion activity at each block position of the plurality of video frames, computing a global motion activity for each video frame, adapting a search range for each block of each video frame, predicting a search center for each block, and estimating motion in the plurality of video frames.

It is noted that the closest prior art of record (Kok US Patent no. 6,363,117) teaches a similar motion estimation method, however, Kok fails to particularly teach or suggest *“using a small diamond search pattern or an adaptive rod pattern for performing an initial search of each pixel block of a plurality of video frames, computing a local motion activity at each block position of the plurality of video frames, computing a global motion activity for each video frame, adapting a search range for each block of each video frame, predicting a search center for each block, and estimating motion in the plurality of video frames.”* as specified in the claim.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
